文、教育、法、理、医、工

III

In 2016 for the first time, young people were allowed to vote when they reached the age of eighteen.

While many agreed with the idea of giving young people a voice in government, only 31% of eighteen- and nineteen-year-olds went to the polls in 2019. I think we can do more to encourage young people to vote.

First, high schools should create opportunities for politicians, especially local assembly members, to talk with students in order to raise awareness of issues that will affect them. Lawmakers will better understand what young people expect from their political leaders.

Second, we can set up polling stations in high schools and colleges. Some may think that e-voting is a solution, but there are still many concerns about identity theft, so we should encourage voting in person.

Count the number of words you wrote and put the number in the box.

Do not count punctuation such as periods and commas as words.
